REACH at OXYTOP Ltd.

Dear Customer!

We inform that we have received the decision of the European Chemicals Agency (ECHA) in Helsinki confirming assigning the registration number for the substance "Reaction mass of butane-2,2-diyl dihydroperoxide and dioxydibutane-2,2-diyl dihydroperoxide" (EC 700-954-4). The complete registration has been made for above 100 tonnes per year.

The registration number for the product **METOX-50: 01-2119514691-43-0004** Oxytop company will continue the substance registration till the year 2018. In accordance with the obligation, we have asked all our suppliers to register their substances and received such an assurance.

Please also note that based on the available and current information, none of our products contain substances of very high concern, mentioned on the candidate list, published by ECHA.

In addition, as a "downstream user" we are a manufacturer of products and we are, and will be concerned to use only registered substances. These activities are coordinated well with our suppliers.

We ensure that Oxytop company intends to fully comply with the regulations of REACH system and secure long-term future for our products, to which you as our customers, can have full confidence. After completing the proper registration of other substances, we will provide you with registration numbers in the Safety Data Sheets in accordance with the requirements of the REACH Regulation. If necessary, we are willing to provide more information.

With regards,

Renata Długosz
